How to protect your online banking information

- Avoid using public Wi-Fi or a public machine to access your accounts online. If you do use a public computer, do not forget to log out.
- Select strong and unique passwords and change them often.
- Never save your passwords when prompted to do so by your computer.
- Embrace the Verification Code process. Multi-factor authentication is the simultaneous use of your personal password along with a bank generated verification code sent directly to your phone or email. This is an additional layer of security provided to protect your bank account online.
- Don't fall for Phishing scams. Adams State Bank will never call or email you to ask you for your personal information or your account numbers.
- Log into your account regularly to review your daily transactions and check your bank statement each month. If you see something out of the ordinary, please contact us immediately at 402-988-2255.

When to update your Account Information

Chances are, something in your life has changed since you opened your first bank account. It is important to remember to update your bank account information and keep your info current. Below are a few reasons you may need to update your account.

- Adding a spouse and or removing a parent as an owner or authorized signer of the account
- Moving or updating your mailing address or physical address
- Adding new phone numbers or removing old phone numbers that no longer exist
- Providing a current email address for everybody listed on the account

Keeping your personal information current is a simple step you can take to ensure your accounts and transactions remain secure.

Need to update your information, please call us at 402-988-2255 or stop in anytime.

Helpful Tip: If you are setting up automatic deposits from your employer to your account at ASB, don't forget to tell them if it is a checking or a savings account.
